

FIELD NOTE  
Unnamed tributary to  
Petaluma Creek  
7-10-68

Name - Unnamed tributary to Petaluma Creek

Stream Section - Surveyed 1/2 mile on either side of Lakeville Road by foot.

Length - 1 mile

Tributary To - Petaluma Creek

T - 3N    R - 6W    Section - 3

Other Names - Unknown

Location of Mouth - No true mouth as such because the stream is absorbed into the ground 1/2 mile to the west of the Lakeville Highway, 2.3 miles north from the intersection of that road and State Highway 37.

Source of Data - Surveyed on July 10, 1968 by Bruce Thomson and Jim Michaels on foot.

Extent of Observation - This stream is located in rolling grass covered terrain to the southeast of Petaluma. At the time of survey the stream was dry. Agricultural practice include cattle grazing. Riparian vegetation was found to be sparse, composed primarily of small stands of eucalyptus. The dry streambed was composed primarily of fine rubble, 50%, coarse gravel, 30%, fine gravel, 10% and sand, 10%. The high water marks along the stream indicate a winter flow of 6 inches deep, and from one to two feet in width.

This unnamed tributary to Petaluma Creek is of no fisheries value and as such no management plan is recommended.
